DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group XI in the reply filed on 11/17/08 is acknowledged. The traversal is on the ground(s) that "claims 1-20, 23 and 25 -28 share an inventive concept and examining the claims in a single application would not place an undue burden on the examiner". These arguments are not found persuasive. The applicant is directed to MPEP 806.07(c) paragraph III, regarding plural combinations requiring a subcombination common to each combination. This section of the MPEP states that:

"When an application includes a claim to a single subcombination, and that subcombination is required by plural claimed combinations that are properly restrictable, the subcombination claim is a linking claim and will be examined with the elected combination. The subcombination claim links the otherwise restrictable combination inventions [...]. The claimed plural combinations are evidence that the subcombination has utility in more than one combination."

This situation is similar to the present application with claim 1 being the single subcombination and the generic linking claim. Therefore, the restriction requirement has authority.

Therefore, the inventions are patentably distinct for the reasons set forth in the restriction requirement. Hence, the burden in the examination of multiple inventions lies in consideration of the patentably distinct inventions in one application.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-24, 26 and 27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10/17/08.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Pearce et al. (US Patent 5,435,657).

Regarding claim 25, Pearce et al. teaches a body (12) having a base (24), a top (refer to figure on page 4 of the detailed action), and sides (30, 76) extending from the base to the top, the body housing a roll of print receiving medium (50) having an axis of rotation extending in a first direction, the body having a guide member (refer to figure on page 4 of the detailed action) on each of two opposing sides extending along said sides in a second direction perpendicular to the first direction for guiding the tape cassette into a tape printer (10) in the second direction and locating the tape cassette in the tape printer (Figure 1).

Regarding claim 28, Pearce et al. teaches wherein each guide member comprises a first elongate member disposed in a plane perpendicular to the opposing

sides and a second elongate member disposed in a plane parallel to the opposing sides (refer to figures below).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. Chvojcek et al. (US Patent 6,422,771) teaches a ribbon cartridge.
 - b. Unno et al. (US 6,406,202) teaches a tape cartridge and tape printing apparatus.

- c. Cockerill et al. (US Patent 6,074,113) teaches a tape printer with cutter and guide mechanism.
